

No more FREE drinks !

Weight-based management tool that incorporates both hardware/software to give you the ultimate in control with ease of use.

BarVu
WEIGHING

BarVu
SOFTWARE

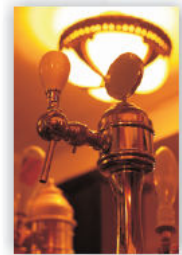

BarVu
DRAFT METERING

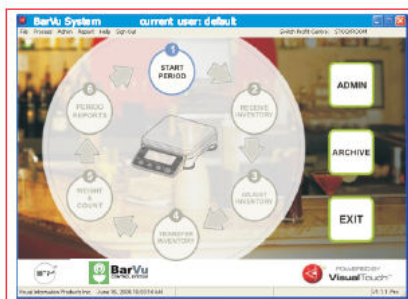

BarVu uses a BarVu 6000 electronic scale. It weighs in both fluid ounces and milliliters up to 200oz (x 0.05oz) or 6l (x 1ml). It also incorporates a RS-232 interface for simple communication with the BarVu software and has a large easy to read LCD backlight display.

All hardware components of the BarVu Control System are controlled by the BarVu Software, developed by the Visual POS Team. One software controls all features for both the liquor and draft metering systems – no more dual management of software required. Created from input and test results from actual bar owners, BarVu Software will become an indispensable part of your profit making tool.

BarVu Draft Metering is driven by a sophisticated control panel that interfaces and is controlled by BarVu Software. Each panel can accommodate up to 8 draft lines and can also be daisy chained to adapt to as many lines required. It also incorporates a RS-232 interface and has a battery backup for data integrity.

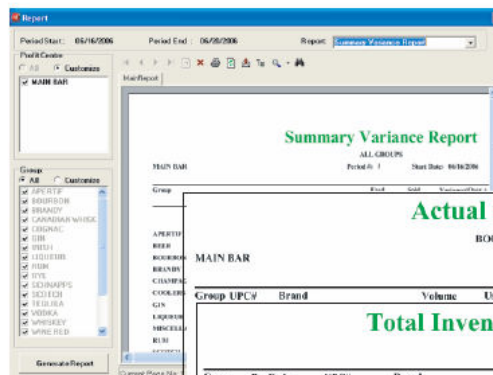

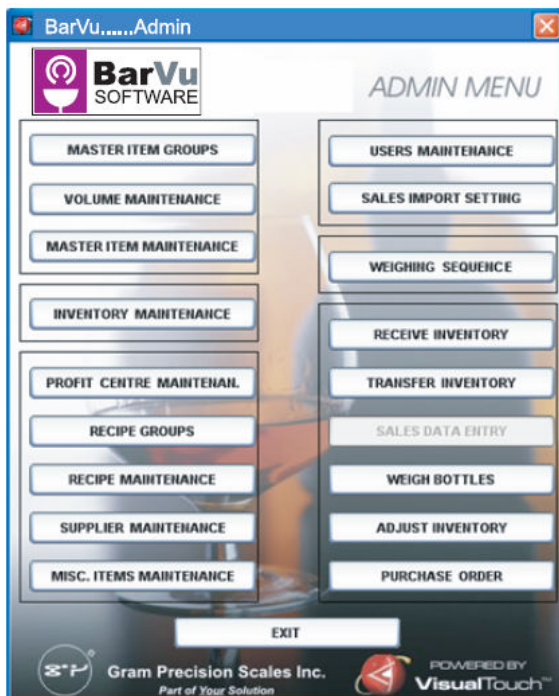

MODEL	SCALE	SOFTWARE	DATA ENTRY	EXPANSION
BarVu Manual	Bw6000	BarVu SOFTWARE	manual	single location scale
BarVu Basic	Bw6000	BarVu SOFTWARE	automatic	single location scale
BarVu Pro	Bw6000	BarVu SOFTWARE	automatic	multiple location scale

SPECIFICATION

SCALE		DRAFT METER		SOFTWARE	
model	BarVu weighing	model	BarVu weighing	model	BarVu Software
manufacturer	Gram Precision Scales	manufacturer	BarVu	developer	Visual POS
cap/incr	200 fluid ounce x 0.05floz 13lb x 0.002lb	inputs	8	interfaces	scale, scanner, PDA ECR
display	6litre x 1ml / 6kg x 1g	pulse reader	flow meter turbine	reports	various (+30 types)
interface	backlight LCD	interface	bi-directional RS-232	data importing	YES
power	RS-232	power	AC with adapter	upgradeable	automatic
	AC/DC with adapter	back up	battery	model upgrade	manual to basic
					manual to pro
					basic to pro

FEATURES

- works with any POS system – if no POS is installed then it will create a sales mix file manually
- with a click of a button, interface with your existing POS and draft metering system
- use the quick Scan and Weigh process to weigh all open bottles in minutes
- create a purchase order in seconds and set par levels
- capable of controlling multiple bars (including stock room) and/or scales
- large selection of reports to choose from
- create and track drink recipes
- database of all major brands with tare weights
